

Make attendance management easier with Tardy Management

Managing attendance just got a whole lot simpler with the Tardy Management module in Securly Pass. This powerful tool allows schools to easily track and manage tardy events, automate consequences, and gain a comprehensive overview of student tardiness trends.

Benefits

- Simplify the management and tracking of student tardiness
- Gain insight into the frequency and patterns of chronic tardiness at a school and student level.
- Encourage punctuality and accountability by defining and automating tardiness consequences.
- Make data-informed decisions to address tardiness and increase attendance.

Features

Tardiness Monitoring

- Track late to school (LTS) and late to class (LTC) events.

Customizable Consequences

- Define tiered consequence ladders separately for LTS and LTC events.
- Assign specific disciplinary actions, such as warnings, principal meetings, and detentions.
- Automate generation of detention appointments and reminders.

Advanced Search Options

- Easily locate tardy events with advanced search options.
- Filter search results by LTS, LTC,

specific time periods, and date ranges, and generate detailed reports.

Data Visualization & Reporting

- Gain a single overview of school-wide tardy events or student specific details.
- Identify tardiness trends at the schoolwide and individual student level.
- Easily run reports to analyze tardy patterns, repeat offenders, and other relevant information
- Daily consequences can be printed off so parents can be informed of disciplinary actions the school will be taking due to LTC or LTS
